

ASHFORD INTELLIGENCE — PRIVACY POLICY

ASHFORD INTELLIGENCE — PRIVACY POLICY

Effective date: May 22, 2026

Last updated: May 22, 2026

1. Scope

This policy applies to information collected through our website, forms, demos, email communications, and during the course of our services. It does not cover data processed under separate contracts where we act as a processor on behalf of a client — those arrangements are governed by the applicable agreement.

2. Information We Collect

We collect two categories of information: data you provide directly and technical/usage data collected automatically.

Data you provide

- Contact and identity details submitted via contact forms, proposals, or email (name, business email, phone, company)
- Business information provided for demos or assessments (industry, revenue band, use-case descriptions)
- Support or correspondence messages and any files you upload to facilitate our work

Automatically collected data

- Device and browser information, IP address, and approximate geographic region
- Usage metrics such as pages visited, timestamps, and interaction events
- Cookies and analytics identifiers

3. AI-Specific Data Practices

- How we use input data: When you provide information to an AI demo, prototype, or production system, we use that input to generate outputs for the requested service. Inputs may be logged for debugging, quality monitoring, and to improve our models unless explicitly excluded in a client contract.
- Model training: We do not use customer-identifiable data to train our core public models unless we have explicit consent or a contractual agreement that permits such use. Aggregated or de-identified data may be used to improve services where legal and appropriate.
- Outputs and liability: AI-generated outputs may be incomplete, inaccurate, or biased. Outputs are provided for convenience and do not replace professional judgment. We are not responsible for decisions you make based on AI outputs unless covered by a separate service agreement.
- De-identification and minimization: We follow data minimization principles: only data necessary for the service is collected, and where possible we remove or redact direct identifiers before storage or secondary use.

4. How We Use Information

- To respond to inquiries and provide the requested services or demos
- To operate, maintain, and improve our website and AI systems
- To monitor and investigate technical issues, security incidents, and abuse
- To send administrative communications and service-related notices

5. Third-Party Services & Processors

We may share personal data with trusted third-party service providers who help deliver our services (hosting, analytics, email delivery, scheduling, payment processors). These providers are contractually

required to protect data and use it only as instructed.

6. International Transfers

Our services and providers may process data in countries outside your location. When personal data is transferred internationally, we use contractual safeguards and standard contractual clauses where required to provide appropriate protections.

7. Data Retention

We retain personal data only as long as necessary for the purposes described in this policy, or as required by law. Typical retention periods:

- Contact and inquiry records: up to 3 years after last contact
- Client engagement data: duration of engagement plus 5 years (or per contract)
- Logs and analytics: retained according to our provider policies and aggregated where possible

8. Security

We implement administrative, technical, and physical safeguards to protect personal data, including encrypted transport (HTTPS), access controls, logging, and periodic security reviews. If you suspect a security incident, contact us immediately.

9. Children's Privacy

Our services are intended for businesses and professionals. We do not knowingly collect personal information from children under 16. If you believe we have inadvertently collected such data, contact us and we will take steps to delete it.

10. Your Rights

Depending on your jurisdiction, you may have rights to access, correct, delete, restrict, or port your personal data, and to object to certain processing. To exercise these rights, contact us at the address below.

11. Contact

Ashford Intelligence
Privacy Contact: John Ryan, Founder

12. Changes to this Policy

We may update this policy to reflect changes in our practices or legal requirements. When material changes occur we will post the updated policy and update the "Last updated" date. Continued use of our services after changes constitutes acceptance of the revised policy.
